INSTAGRAM OVERVIEW

Instagram is a popular mobile-based photo/video sharing app that allows users to take and share visuals on a variety of social channels, including Facebook, Twitter and Tumblr. Instagram is growing rapidly, with more than 130 million active users, making it the fourth most popular social channel.

- Travel photos are some of the most popular content shared on Instagram.
- There are over 9 million photos tagged with #travel, and nearly 9 million others are tagged with #vacation.
- The ability to tag photos/videos with locations allows users to make a map of their experiences throughout the world.

#ONLYINMN OVERVIEW

Explore Minnesota Tourism (EMT) is launching a new marketing campaign in 2014 called Only in Minnesota. The campaign differentiates and celebrates specific adventures travelers can experience only in Minnesota. EMT will establish an official campaign hashtag to aggregate content across channels, including Instagram.

By participating in the campaign and tagging photos with #OnlyinMN, your photos can be featured as part of the larger hashtag gallery. EMT will selectively feature images from #OnlyinMN in integrated campaign efforts across its channels, including paid advertising, to raise awareness about the hashtag and encourage participation.
